INTERNSHIP LOG BOOK

Student Name: Mugoya Andrew
Registration No: M24B23/013
Programme: Bachelor of Science in Computer Science
Institute Supervisor: Ddumba Walakira
Contact: 0702826557
Host Organization: National Housing and Construction Company
Host Supervisor: Reuben Magayane
Contact: 0774243224
Internship Period: From: 1st June, 2026 To: 21st August, 2026

WEEK 1: FROM 8th JUNE, 2026 TO 12th JUNE, 2026

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
8th June 2026	Comprehensive orientation session covering the company's organisational structure, detailed workplace policies, critical safety protocols, and a physical tour of the various facilities and departments.	Gained a solid understanding of the corporate culture, the established chain of command, and the specific professional expectations required to thrive in a formal corporate environment.	[COMMENT HERE]	[SIGNATURE]
9th June 2026	Formal introductions to fellow workmates and team members, followed by team-building exercises and a meeting to clarify individual roles and responsibilities within the IT department.	Learned the critical importance of building strong professional relationships, understanding team dynamics, and the value of effective communication in a collaborative corporate setting.	[COMMENT HERE]	[SIGNATURE]
10th June 2026	Installation of the Windows operating system on a batch of new personal computers intended for various employees across different departments.	Acquired hands-on experience with the complete OS installation process, including driver configuration, system customisation to meet specific user requirements, and initial security setup.	[COMMENT HERE]	[SIGNATURE]

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
11th June 2026	Deployment of the newly configured PCs to their respective employees, including the physical setup at workstations, connecting peripherals, and a formal user handover with basic guidance.	Gained practical knowledge of hardware deployment logistics, efficient asset tracking and management, and the best practices for providing effective end-user support during a technology transition.	[COMMENT HERE]	[SIGNATURE]
12th June 2026	Installation of essential applications, software suites, and targeted security updates on each employee's new PC, tailored to their specific role and daily operational needs.	Learned about the application lifecycle, including managing software versions, ensuring compatibility, and strategising update schedules to prevent workflow disruption and minimise downtime.	[COMMENT HERE]	[SIGNATURE]

WEEK 2: FROM 15th JUNE, 2026 TO 19th JUNE, 2026

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
15th June 2026	Deployment of PCs to fellow interns and the complete setup of intern workstations, including the provision of necessary equipment, peripherals, and accessories.	Learned the importance of precise coordination of resource allocation, thorough documentation of asset issuance procedures, and the essential support required for successful onboarding of new team members.	[COMMENT HERE]	[SIGNATURE]
16th June 2026	Setup of intern PCs followed by dedicated self-study and a thorough refresher on networking fundamentals, including areas not covered in my previous coursework such as advanced routing.	Deepened my understanding of core networking concepts, including IP addressing, subnetting, the OSI model, and practiced essential troubleshooting commands to diagnose network issues.	[COMMENT HERE]	[SIGNATURE]
17th June 2026	Performed repair and reassembly of a faulty CPU unit, which involved diagnosing hardware faults, cleaning internal components of dust, and meticulously reassembling all parts.	Enhanced my hardware troubleshooting skills, learned to correctly identify various components, and practised the safe handling of delicate parts like the CPU, RAM modules, and power supply units.	[COMMENT HERE]	[SIGNATURE]

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
18th June 2026	Walk-through of the entire company premises to analyse and document the existing network infrastructure, including cabling, switches, routers, and wireless access points.	Gained a practical understanding of physical and logical network topologies, learned tracing cables to map connections, and identified potential bottlenecks that could impact network performance.	[COMMENT HERE]	[SIGNATURE]
19th June 2026	Received instruction from my supervisor to redesign the company's network diagram to be more clear, organised, and scalable to support future growth and simplify troubleshooting.	Learned about the critical need for accurate network documentation and the principles of creating professional, clear network diagrams using tools like Visio or draw.io for effective communication.	[COMMENT HERE]	[SIGNATURE]

WEEK 3: FROM 22nd JUNE, 2026 TO 26th JUNE, 2026

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
22nd June 2026	Initiated the development of the NHCC Enterprise Application. Set up the initial React project repository using Vite for fast bundling and development, and configured Tailwind CSS to ensure rapid, responsive UI styling.	Learned the importance of a solid initial project setup, including choosing the right build tools and CSS frameworks. Gained practical experience in configuring a modern frontend environment for efficient development.	[COMMENT HERE]	[SIGNATURE]
23rd June 2026	Designed the primary layout shell for the application, including the sidebar navigation and top header components. Implemented the initial routing structure using React Router to navigate between the Dashboard, Income, and Expenses pages.	Gained a deep understanding of component-based architecture and the principles of creating a scalable UI. Learned how to implement client-side routing to create a seamless single-page application experience.	[COMMENT HERE]	[SIGNATURE]
24th June 2026	Built the Income and Expenses components, creating the necessary forms to allow users to input financial records. Implemented state management using React Context to ensure data flows smoothly and predictably between the different pages.	Learned the importance of structured state management in a complex application. Gained practical experience in building forms and managing user input, and understood how to use React Context to avoid prop-drilling.	[COMMENT HERE]	[SIGNATURE]

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
25th June 2026	Created interactive data tables with sorting and filtering capabilities for easy viewing of transaction histories. Wrote the core logic to calculate total balances dynamically based on the inputted income and expense arrays.	Developed skills in data manipulation and presentation. Learned how to build reusable, interactive table components and implement dynamic calculations that respond to changes in the underlying data state.	[COMMENT HERE]	[SIGNATURE]
26th June 2026	Integrated a charting library to visualize spending patterns, rendering dynamic pie charts and bar graphs on the analytics dashboard. Began work on the Financial Goals tracking module, allowing users to set target amounts and deadlines.	Gained hands-on experience with data visualization techniques. Learned how to transform raw data into meaningful graphical representations and started to understand the requirements for building a feature-rich goal-setting module.	[COMMENT HERE]	[SIGNATURE]

WEEK 4: FROM 29th JUNE, 2026 TO 3rd JULY, 2026

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
29th June 2026	Completed the Financial Goals module by writing mathematical helper functions to calculate the percentage completion of goals based on current savings. Designed the dashboard widgets to display high-level summaries of the user's financial health at a glance.	Learned to write clean, efficient mathematical functions for business logic. Gained experience in designing intuitive dashboard interfaces that present complex data in a simple, user-friendly format for quick decision-making.	[COMMENT HERE]	[SIGNATURE]
30th June 2026	Implemented dark mode support across the entire application using Tailwind's dark variant class strategy. This involved adding dark variants to all color classes and ensuring a seamless transition between themes.	Learned a practical, modern approach to implementing theme switching in a web application. Understood the power of utility-first CSS frameworks in managing complex styling variations like dark mode.	[COMMENT HERE]	[SIGNATURE]
1st July 2026	Refined the user experience by adding Framer Motion animations to page transitions and modal popups. Conducted comprehensive responsive design testing to ensure the application looks perfect on both mobile and desktop screens.	Gained skills in enhancing UI/UX with subtle animations. Learned the principles of responsive web design and the importance of testing across multiple device sizes to ensure a consistent user experience.	[COMMENT HERE]	[SIGNATURE]

Continued on next page

Date	Activity	Lessons Learned	Supervisor's Comment	Supervisor's Signature
2nd July 2026	Finalized the base UI components for the financial tracking application. Began planning and preparing the architecture for the enterprise backend integration with the NHCC systems.	Learned the importance of finalizing and polishing a frontend before backend integration. Gained insights into planning for architectural changes to move from a client-side storage model to a server-backed enterprise application.	[COMMENT HERE]	[SIGNATURE]
3rd July 2026	Conducted a final code review and cleanup of the frontend application. Documented the frontend architecture and prepared the development environment for the upcoming backend and API integration phase scheduled for the following week.	Reinforced the importance of code quality and documentation in a professional software project. Learned to structure a codebase and its documentation to facilitate a smooth transition between different phases of the SDLC.	[COMMENT HERE]	[SIGNATURE]

Internship Summary

- **Student Name:** Mugoya Andrew
- **Registration No:** M24B23/013
- **Programme:** Bachelor of Science in Computer Science
- **Host Organization:** National Housing and Construction Company
- **Supervisor:** Reuben Magayane
- **Internship Period:** 1st June, 2026 - 21st August, 2026
